

# Precision Pointing & Stabilization

## Gimbal Platforms for Mission Critical Sensors

10 inch Gimbal

### Airborne, Ground and Maritime Applications

- Off the shelf designs
- - 5", 10", 14"
- Multi axis configurations
- High accuracy positioning & reporting
- Precision line-of-sight stabilization
- Low weight to volume ratios
- Maximized payload capacity
- Continuous azimuth capability
- Single LRU – on board electronics
- Support for laser payloads
- Gimbal mirror applications

### Gimbal development and sensor payload integration

– customized to meet your requirements!
